ETNA

Because Etna's soils are shaped by volcanic eruptions, they are incredibly complex. Sometimes, even within the same plot, they vary greatly in depth and texture, from cooled, basalt-bearing lava flows (Sciara) to volcanic ash. All of the volcano's vineyards had to be wrested from Etna through hard work. Debris had to be removed and terraces were formed to protect the iron-rich, fertile sand and ash soils from being washed away.
